| NET-7/NET-9 Internal request: | Based on the discussion, the panel consensus was to add temozolomide +/- capecitabine to the treatment options for the following bronchopulmonary/thymic NETs:  
  - Low/intermediate grade locoregional unresectable disease  
  - Metastatic disease if intermediate grade (atypical), or low grade (typical) and clinically significant tumor burden, or evidence of disease progression. | YES 17  | NO 0  | ABSTAIN 0  | ABSENT 11  |
| Institutional review comment to consider adding temozolomide +/- capecitabine as an option for bronchopulmonary/thymus NETs if:  
  - Low or intermediate grade locoregional unresectable disease  
  - Distant metastatic disease | | | | |
