| **BL-1**
External request:
Submission from Photocure, Inc. to include Blue Light Cystoscopy with Cysview at the time of surveillance and TURBT recommendations within the following algorithmic steps: Initial Evaluation and Primary Evaluation/Surgical Treatment Steps within BL-1, Secondary Surgical Treatment Steps within BL-2, Cystoscopy Steps within BL-E Table 1, and Evaluation Step within BL-3. Based on a review of data and discussion, the panel consensus did not support the addition of these specific recommendations into the Guidelines due to the lack of availability. The recommendation is currently listed as a consideration on BL-B (1 of 4). | YES 0  NO 13  ABSTAIN 0  ABSENT 15 |
| **BL-4**
Internal request:
Panel discussion to reassess the category recommendation for concurrent chemoradiotherapy as primary treatment for Stage II clinical stage bladder cancer. Based on the discussion, the panel consensus was that concurrent chemoradiotherapy is supported by high-level evidence and the category was changed from a category 2A to a category 1 recommendation. | YES 11  NO 2  ABSTAIN 0  ABSENT 15 |
| **BL-6**
Internal request:
Panel discussion to reassess the category recommendation for concurrent chemoradiotherapy as primary treatment for Stage IIIA clinical stage bladder cancer. Based on the discussion, the panel consensus was that concurrent chemoradiotherapy is supported by high-level evidence and the category was changed from a category 2A to a category 1 recommendation. | YES 11  NO 2  ABSTAIN 0  ABSENT 15 |
