### Guideline Page and Request

**OCC-B (2 of 4)**

Internal request: Institutional Review comment requesting the panel to consider the following chemotherapy regimens:

1. Irinotecan 60 mg/m² IV on days 1, 8, and 15 + carboplatin AUC 5 IV on day 1, repeat every 28 days.
2. Irinotecan 100 mg/m² IV + gemcitabine 1000 mg/m² IV on days 1 and 8, repeat every 21 days.

### Panel Discussion/References

Based on the data in the noted references, the panel consensus was to include both regimens for Adenocarcinoma.
