

NCCN Trends™ is an analytics tool from the National Comprehensive Cancer Network® (NCCN®) that surveys how clinicians across the U.S. and around the globe are delivering cancer care. This summary includes the results of the March 2013 NCCN Trends™ Survey, which focused on Chronic Myelogenous Leukemia. This survey was sent to U.S. and International users of NCCN.org.

DEMOGRAPHICS

Distribution of Respondent Types (n = 889)

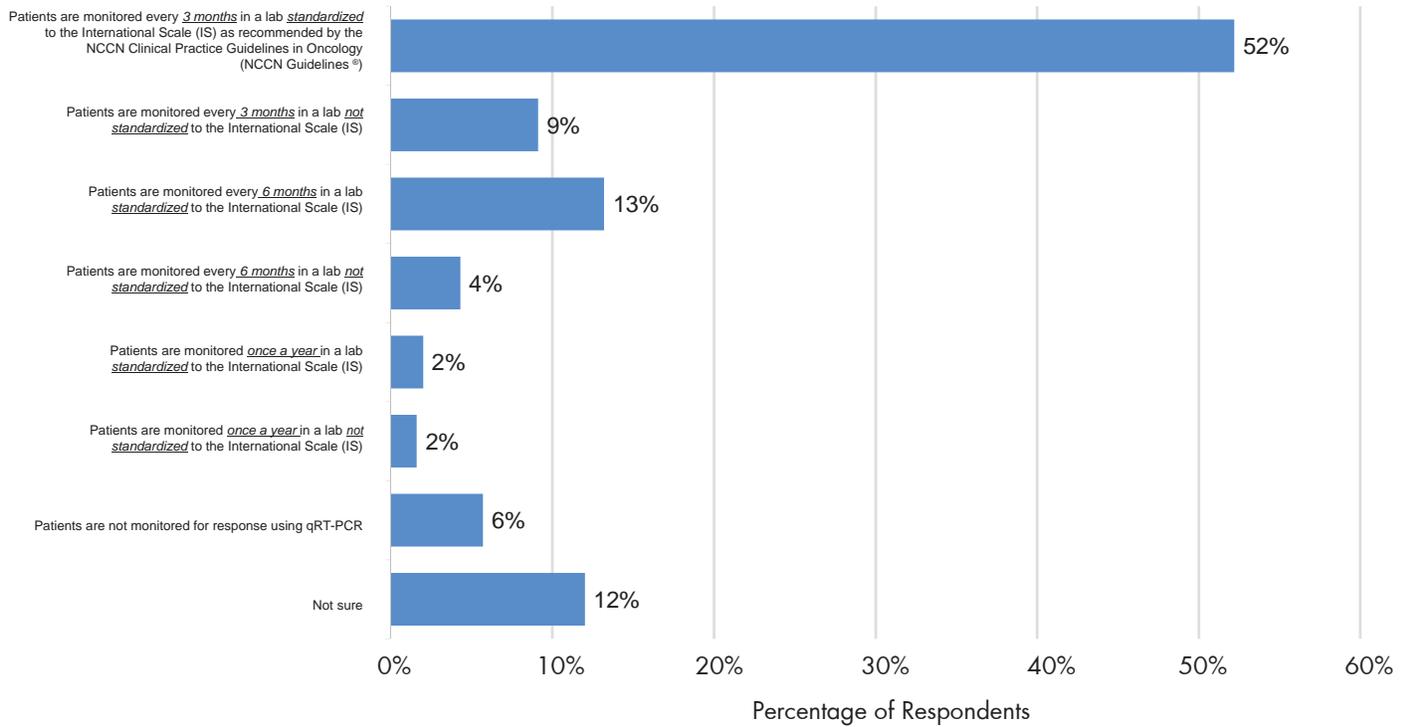

Q1. Do you treat patients with chronic myelogenous leukemia (CML)? (n = 889)

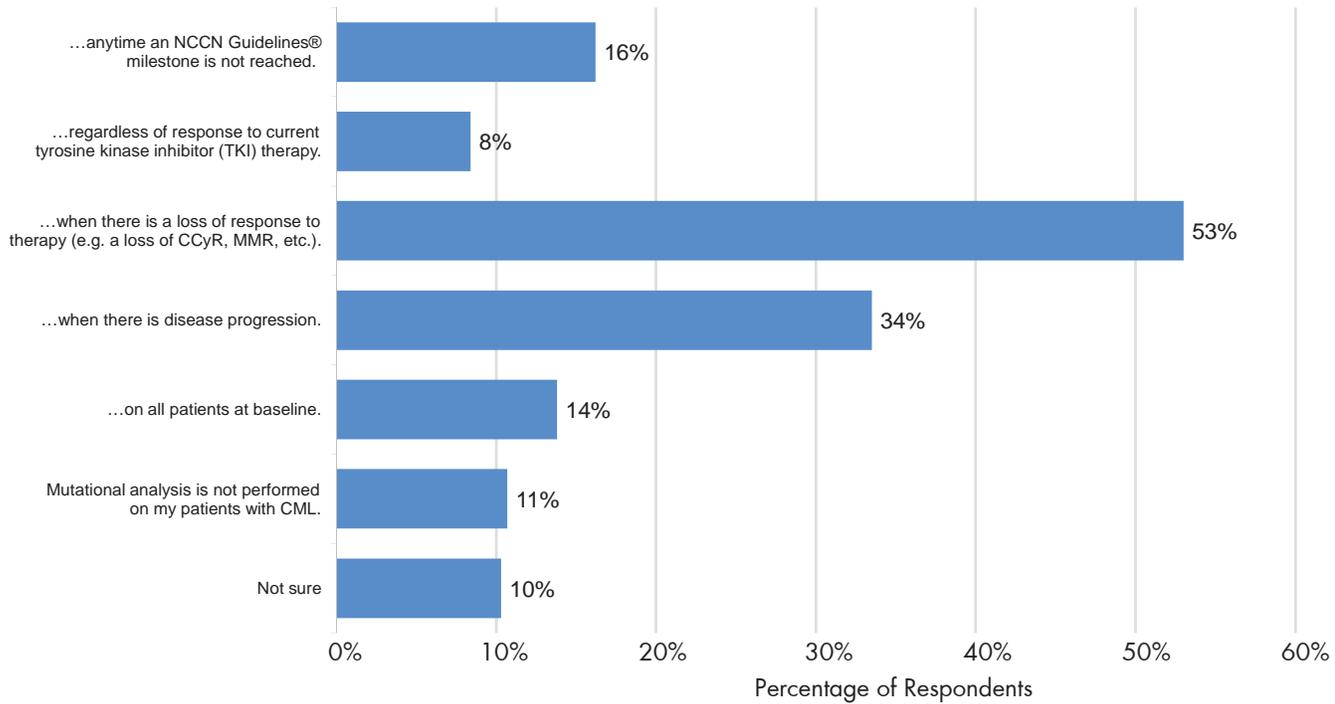

Results: March 2013
CHRONIC MYELOGENOUS LEUKEMIA

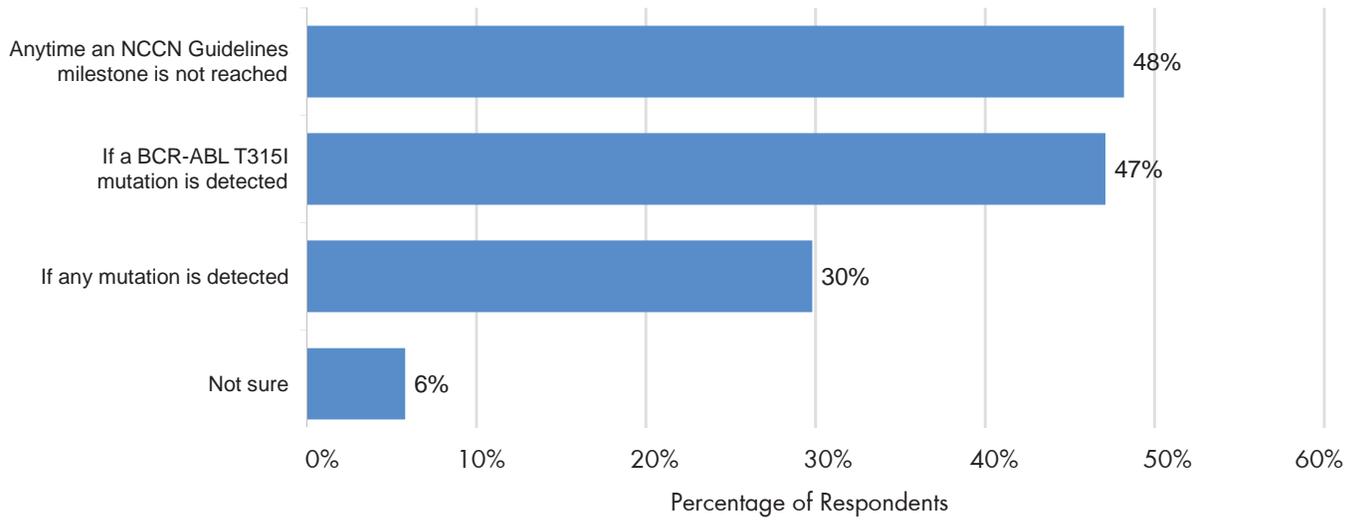

Q2. How often do you monitor your patients with CML with quantitative reverse transcriptase polymerase chain reaction (qRT-PCR) for a treatment response? (n = 508)

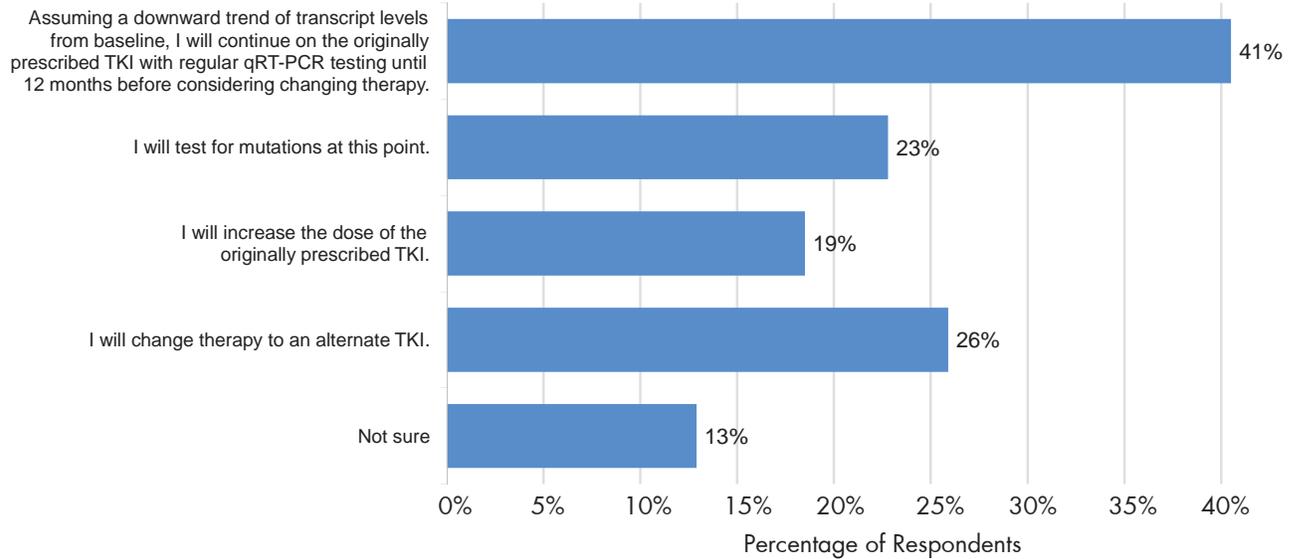

Q3. Mutational analysis is performed on your patients with CML... (please complete the statement, select all that apply) (n = 487)

Q4. Following a mutational analysis test on your patients with CML, when do you decide to switch or modify therapy? (select all that apply) (n = 382)

Q5. Assuming compliance or drug-drug interactions are not factors, what would be your next step if your patients did not achieve a $\leq 10\%$ BCR-ABL response by qRT-PCR at 3 months? (select all that apply) (n = 464)

NCCN Trends™ is an analytics tool from the National Comprehensive Cancer Network® (NCCN®) that surveys how clinicians across the U.S. and around the globe are delivering cancer care. NCCN Trends™ surveys are designed to reach targeted populations that can include several thousand clinicians as a potential sample size. NCCN can also provide analytics on existing NCCN Trends™ and clinician demographic data sets, allowing for greater insight into oncology practice patterns.

To commission an **NCCN Trends™** survey, to discuss analytic and data services, or to request information on other NCCN programs and resources, please contact:

National Comprehensive Cancer Network® (NCCN®)

The National Comprehensive Cancer Network® (NCCN®), a not-for-profit alliance of 21 of the world's leading cancer centers, is dedicated to improving the quality and effectiveness of care provided to patients with cancer. Through the leadership and expertise of clinical professionals at NCCN Member Institutions, NCCN develops resources that present valuable information to the numerous stakeholders in the health care delivery system. As the arbiter of high-quality cancer care, NCCN promotes the importance of continuous quality improvement and recognizes the significance of creating clinical practice guidelines appropriate for use by patients, clinicians, and other health care decision-makers. The primary goal of all NCCN initiatives is to improve the quality, effectiveness, and efficiency of oncology practice so patients can live better lives.
