

NCCN Trends™ is an analytics tool from the National Comprehensive Cancer Network® (NCCN®) that surveys how clinicians across the U.S. and around the globe are delivering cancer care. This summary includes the results of the September 2012 NCCN Trends™ Survey, which focused on Non-Hodgkin's Lymphoma. This survey was sent to U.S. and International users of NCCN.org.

DEMOGRAPHICS†

Distribution of Respondent Types (n = 1,778)

†Note: Percentages may not total 100 because of rounding.

Q1. Do you treat patients with non-Hodgkin's lymphoma? (n = 1,520)

Q2. For a patient with follicular non-Hodgkin's lymphoma who has relapsed after maintenance therapy with rituximab, what options do you discuss with your patient? (Select all that apply) (n = 687)

Q3. For a patient with relapsed, follicular non-Hodgkin's lymphoma, please rate the level of importance of the following variables when selecting a treatment option (1 being the most important to 7 being the least important): †

†Note: Percentages may not total 100 because of rounding.

NCCN Trends™ is an analytics tool from the National Comprehensive Cancer Network® (NCCN®) that surveys how clinicians across the U.S. and around the globe are delivering cancer care. NCCN Trends™ surveys are designed to reach targeted populations that can include several thousand clinicians as a potential sample size. NCCN can also provide analytics on existing NCCN Trends™ and clinician demographic data sets, allowing for greater insight into oncology practice patterns.

To commission an **NCCN Trends™** survey, to discuss analytic and data services, or to request information on other NCCN programs and resources, please contact:

National Comprehensive Cancer Network® (NCCN®)

The National Comprehensive Cancer Network® (NCCN®), a not-for-profit alliance of 21 of the world's leading cancer centers, is dedicated to improving the quality and effectiveness of care provided to patients with cancer. Through the leadership and expertise of clinical professionals at NCCN Member Institutions, NCCN develops resources that present valuable information to the numerous stakeholders in the health care delivery system. As the arbiter of high-quality cancer care, NCCN promotes the importance of continuous quality improvement and recognizes the significance of creating clinical practice guidelines appropriate for use by patients, clinicians, and other health care decision-makers. The primary goal of all NCCN initiatives is to improve the quality, effectiveness, and efficiency of oncology practice so patients can live better lives.
