FEATURING:

**Premium Exhibits**
Visit exhibits from industry, health information technology companies, NCCN Member Institutions, and more.

**General Poster Sessions I & II**
Posters will be presented during breakfast, lunch, and breaks on Friday and Saturday.

**Poster Tours**
12:30 PM | Friday and Saturday
Experts will lead guided tours of the posters and discuss research highlights.

**NEW First Timers Breakfast**
7:30 – 8:30 AM | Friday
First-time conference attendees can enjoy giveaways, enter to win prizes, and meet with NCCN staff and leaders. Return attendees are also welcome!

**NEW Headshot Station | Booth #628**
12:00 – 3:30 PM | Friday and Saturday
Smile! Stop by to have your headshot taken by a professional photographer. Photos will be taken on a first-come, first-served basis.

**Reimbursement Resource Room**
Connect with organizations about patient support resources and services to mitigate reimbursement challenges.

**Patient Advocacy Pavilion**
Visit patient advocacy kiosks representing a range of disease types and learn about resources for patients.

**Visit NCCN Booth #624 and NCCN Foundation Booth #622**
- Learn about NCCN resources for clinicians and patients.
- Drop off completed Poster Session Form(s) to enter to win an Amazon Echo Show 5.
- Visit at least six booths and drop off a completed Exhibitor Passport form to receive a free prize while supplies last.
- Complete the NCCN Trends™ Survey to enter to win Beats Studio Buds.

**Product Theaters**
Magnolia 7, 8, 9
Hear about new products and programs in oncology.
At Eisai, everything we do is guided by a simple principle: patients and their families come first. We spend time with them. We listen and we learn about their lives, their desires and their greatest needs. We call this human health care or hhc, giving first thoughts to patients and their families and helping increase the benefits health care provides.

Our hhc mission is what drives us to discover innovative solutions and therapies that help address unmet needs within the communities that we seek to serve.

Eisai is proud to support the National Comprehensive Cancer Network.

My fellow colleagues,

In patients with polycythemia vera (PV), the threat of thrombosis is real, and it is within our power to reduce it. Studies have demonstrated that elevated Hct increases a patient’s thrombotic risk. As shown in the graph below from the CYTO-PV study, the rate of CV death and major thrombosis was 4 times as high among patients whose Hct was maintained between 45% and 50% compared with those whose Hct was maintained strictly below 45%.

One of the main goals of treatment for our PV patients should be to maintain strict Hct control. From my clinical perspective, it’s important for my high-risk PV patients to remain below that 45% threshold, ideally without any need for phlebotomy. It’s a red flag to me when my high-risk patients on HU still need 3 or more phlebotomies a year. Frequent phlebotomies in patients on cytoreductive therapy signal a need to optimize treatment.

The CYTO-PV study has substantially informed the way I manage my PV patients. These data challenge the notion that PV is a cancer with a benign course.

Does molecular profiling help drive your treatment selection in newly diagnosed AML? **It should.** Mutated IDH1 (mIDH1) is an oncogenic driver in up to 10% of AML cases. More importantly, mIDH1 is an actionable target for treatment. That’s why both the NCCN Clinical Practice Guidelines in Oncology (NCCN Guidelines®) and the ASH-CAP Guidelines recommend performing molecular and cytogenetic analyses to identify IDH1 mutations in patients with AML. Further, the NCCN Guidelines® recommend expediting these analyses.

**So the next time you have a patient with newly diagnosed, IC-ineligible AML, test for IDH1 mutation status BEFORE choosing treatment—you first step to treatment selection could be your patient’s first step to better outcomes.**
Together with GSK Oncology offers a variety of access and reimbursement services in one location for all GSK oncology products.

**Reimbursement support**

- Insurance benefits investigation
- Information about prior authorizations
- Guidance on insurance denials or coverage requirements
- Coding and claims assistance for products and related services

Together with GSK Oncology does not guarantee coverage or payer reimbursement for product treatment or administration. Healthcare professionals should confirm information directly with payers.

**Access assistance**

- Co-pay assistance for eligible commercially insured patients
- Patient assistance program that makes free product available to eligible patients
- Information about alternative funding sources

For program terms and eligibility and to obtain a Together with GSK Oncology Enrollment Form, visit TogetherwithGSKOncology.com or call 1-844-4GSK-ONC (1-844-447-5662), Monday-Friday, (8AM to 8PM ET).

Connect with Together with GSK Oncology today.

Acrotech Biopharma, Inc.  Booth #601

Founded in 2018, Acrotech Biopharma Inc. was formed as a global platform to commercialize innovative proprietary medications. The company aims to launch scientifically advanced products to address unmet needs and deliver value to patients as well as all healthcare stakeholders. Acrotech aspires to be a patient focused, research-based organization that strives to launch treatments which are accessible to patients that need them.

Astellas  Booth #700

Astellas is committed to turning innovative science into medical solutions that bring value and hope to patients and their families. Keeping our focus on addressing unmet medical needs and conducting our business with ethics and integrity enables us to improve the health of people throughout the U.S. and around the world.

AstraZeneca  Booth #803

AstraZeneca is a global, science-led biopharmaceutical company that focuses on the discovery, development, and commercialization of prescription medicines in Oncology, Rare Diseases and BioPharmaceuticals, including Cardiovascular, Renal & Metabolism, and Respiratory & Immunology. Based in Cambridge, UK, AstraZeneca operates in over 100 countries and its innovative medicines are used by millions of patients worldwide. Please visit www.astrazeneca-us.com and follow us on social media @AstraZeneca.

BeiGene  Booth #716

BeiGene is a global oncology company that is discovering and developing innovative treatments that are more affordable and accessible to cancer patients worldwide. With a broad portfolio, we are expediting development of our diverse pipeline of novel therapeutics through our internal capabilities and collaborations. We are committed to radically improving access to medicines for far more patients who need them. Our growing global team of more than 10,000 colleagues spans five continents, with administrative offices in Basel, Beijing, and Cambridge, U.S.

CVS Specialty  Booth #617

Personalized Specialty Pharmacy Services
Our commitment to helping patients and their physicians manage complex drug therapies by delivering individualized patient care with compassion and dedication has made us one of the leading specialty pharmacies in the country. To learn more or to enroll patients, call 1-800-238-7828.

Daiichi Sankyo, Inc.  Booth #606

ECG Management Consultants  Booth #602

With knowledge and expertise built over the course of 50-plus years, ECG is a national consulting firm that is redefining healthcare together with its clients. ECG offers a broad range of strategic, financial, operational, and technology-related consulting services. ECG is an industry leader, offering specialized expertise to hospitals, health systems, medical groups, academic medical centers, children's hospitals, ambulatory surgery centers, investors, and payers/health plans. As an affiliated partner of Siemens Healthineers, ECG's subject matter experts have a proven track record of delivering results fueled by top talent and technology.

Eisai  Booth #701

At Eisai Inc., human health care (hhc) is our goal. We give our first thoughts to patients and their families and help to increase the benefits health care provides. As the U.S. pharmaceutical subsidiary of Tokyo-based Eisai Co., Ltd., we have a passionate commitment to patient care that is the driving force behind our efforts to help address unmet medical needs. We are a fully integrated pharmaceutical business with discovery, clinical, and marketing capabilities. Our key areas of focus include oncology and neurology (dementia-related diseases and neurodegenerative diseases). To learn more about Eisai Inc., please visit us at www.eisai.com/US and follow us on Twitter and LinkedIn.

Eli Lilly and Company  Booth #822

Lilly is a global healthcare leader that unites caring with discovery to create medicines that make life better for people around the world. Across the globe, Lilly employees work to discover and bring life-changing medicines to those who need them, improve the understanding and management of disease, and give back to communities through philanthropy and volunteerism.

EMD Serono  Booth #620

EMD Serono is a science-led organization of curious minds dedicated to delivering transformative medicines that can make a difference in the lives of people affected by cancer.

We apply our scientific curiosity to tackling challenging tumor types in key areas—gastrointestinal (GI), genitourinary (GU), and thoracic cancers—where there are unmet needs and where we believe we can drive transformation of patient care.
By relentlessly pursuing potential solutions to even the most complex cancers, we hope to illuminate a path to scientific breakthroughs that impact patient care.

**Fennec Pharmaceuticals**  
Booth #709

Fennec Pharmaceuticals is a biotechnology company dedicated to improving the lives of children with cancer who experience hearing loss as a result of chemotherapy.

**Foundation Medicine**  
Booth #900

Your Essential Partner in Cancer Care

Foundation Medicine is a pioneer in molecular profiling for cancer, working to shape the future of clinical care and research. We collaborate with a broad range of partners across the cancer community and strive to set the standard for quality, scientific excellence, and regulatory leadership. Our deep understanding of cancer biology helps physicians make informed treatment decisions for their patients and empowers researchers to develop new medicines. We are driven to help our partners find answers and take action to transform cancer care.

**Genmab**  
Booth #904

Genmab is an international biotechnology company with a core purpose to improve the lives of people with cancer and other serious diseases. To help develop and deliver novel therapies to patients, Genmab has formed 20+ strategic partnerships with biotechnology and pharmaceutical companies. Genmab's proprietary pipeline includes bispecific T-cell engagers, next-generation immune checkpoint modulators, effector function enhanced antibodies and antibody-drug conjugates. Visit us at Genmab.com or Twitter.com/Genmab.

**Geron**  
Booth #916

Geron is a late-stage clinical biopharmaceutical company focused on development and commercialization of therapies in hematologic malignancies. We are committed to pursuing discoveries with the potential to extend and enrich the lives of patients.

**Incyte**  
Booth #703

Incyte is a Wilmington, Delaware-based, global biopharmaceutical company focused on finding solutions for serious unmet medical needs through the discovery, development, and commercialization of proprietary therapeutics. For additional information on Incyte, please visit incyte.com and follow @Incyte.

**InformedDNA**  
Booth #924

Established in 2007 as the nation's pioneer telehealth Genetic Counseling company, InformedDNA is an unrivaled leader in genetic counseling with a force of fully licensed, board-certified genetics experts that cover all subspecialties. We consistently earn market-leading Net Promoter Scores >75 and Provider Satisfaction Scores over 95%. Through innovative solutions that revolutionize the application of genomic insights, we enhance patient care, improve outcomes for all, and shape the future of precision health. InformedDNA is headquartered in St. Petersburg, FL. Learn more about the benefits of partnering with InformedDNA at InformedDNA.com

**Jazz Pharmaceuticals**  
Booth #902

Jazz Pharmaceuticals is focused on developing life-changing medicines for people with serious diseases with limited or no options, to allow patients to live their lives fully. By transforming biopharmaceutical discoveries into novel medicines, we are working to give people the opportunity to redefine what's possible – to make the “small wins” big again.

We are a global biopharmaceutical company with a diverse portfolio of products for adults and children, with expertise in two key therapeutic areas: neuroscience and oncology. In oncology, we investigate medicines for hard-to-treat cancers with the purpose of transforming the lives of patients and their families.

**Johnson & Johnson**  
Booth #723

At Johnson & Johnson, we believe health is everything. Our strength in healthcare innovation empowers us to build a world where complex diseases are prevented, treated, and cured, where treatments are smarter and less invasive, and solutions are personal. Through our expertise in Innovative Medicine and MedTech, we are uniquely positioned to innovate across the full spectrum of healthcare solutions today to deliver the breakthroughs of tomorrow, and profoundly impact

Empower your patients.

Too many CLL patients are navigating their disease alone.

Please consider connecting your patients with the vital support, education, and other valuable resources that CLL Society can offer as the world’s leading authority on chronic lymphocytic leukemia.

About Our Exhibitors

Karyopharm Therapeutics, Inc.   Booth #600

Karyopharm Therapeutics is a commercial-stage pharmaceutical company pioneering novel first-in-class cancer therapies and dedicated to the discovery, development, and commercialization of drugs to treat cancer. We believe in the extraordinary – in the dedication to positively impact patient lives and treat cancer. We are recognized leaders in XPO1 inhibition, which has the potential to engage the cell's innate ability to fight cancer. Patients embody extraordinary and deserve the same from those in their communities. That is why we choose to spend our time where it has the most significant impact: Multiple Myeloma, Endometrial Cancer, Myelofibrosis, and Diffuse Large B-Cell Lymphoma.

Kite, A Gilead Company   Booth #604

Kite, a Gilead Company, is a global biopharmaceutical company based in Santa Monica, California, focused on cell therapy to treat and potentially cure cancer. As the global cell therapy leader, Kite has treated more patients with CAR T-cell therapy than any other company. Kite has the largest in-house cell therapy manufacturing network in the world, spanning process development, vector manufacturing, clinical trial supply and commercial product manufacturing. For more information on Kite, please visit www.kitepharma.com.

La Roche-Posay a L’OREAL Company   Booth #621

Company Description: We are committed to providing educational resources for patients and their caregivers throughout the cancer journey. Recommended by 90,000 dermatologists worldwide, we partner with dermatologists to stay at the forefront of skincare science, pioneering cutting-edge topics like skin's microbiome. With over 750+ studies and 25 years of extensive research, we are committed to developing safe and effective products that are dermatologist developed and tested.

LeanTaaS   Booth #819

LeanTaaS is the leading provider of AI-powered and cloud-based capacity management, staffing, and patient flow software for health systems. Our iQueue products for operating rooms, infusion centers, and inpatient units are trusted by 1,000+ hospitals and centers across 185 health systems. Our solutions use Lean principles and AI/ML predictive and prescriptive analytics to forecast future demand based on historical data, recent pattern shifts, and real-time insights. They help staff and providers act quickly, confidently, and decisively to avoid operational bottlenecks before they even happen.

Merck & Co., Inc.   Booth #808

At Merck, our goal is to translate breakthrough science into innovative oncology medicines to help people with cancer. The potential to bring new hope to people with cancer drives our purpose and our commitment. As part of our focus on cancer, Merck is committed to clinical research with one of the largest development programs in the industry across more than 30 tumor types.

Novartis Pharmaceuticals Corporation   Booth #607 & #708

Novartis is an innovative medicines company. Every day, we work to reimagine medicine to improve and extend people’s lives so that patients, healthcare professionals and societies are empowered in the face of serious disease. Our medicines reach more than 250 million people worldwide. Reimagine medicine with us: Visit us at www.novartis.com and connect with us on LinkedIn, Facebook, X/Twitter and Instagram.

ONCOassist   Booth #926

ONCOassist is a comprehensive suite of decision support tools developed by oncology professionals, for oncology professionals. It includes a range of breakthrough tools designed to manage patient care effectively.

Oncology Nutrition – Registered Dieticians/Nutritionist   Booth #824

Oncology Nutrition Dietetic Practice Group (OND) of the Academy of Nutrition and Dietetics (AND) fosters excellence in oncology nutrition via an evidence-based nutrition care process. The ON-DPG also promotes education, research and advocacy through publications, symposiums, and webinars. Attendees will gain education materials on nutrition screening and malnutrition diagnosing as up to 80% of cancer patients become malnourished during their cancer continuum. The ON-DPG endorses the vital role of a Registered Dietitian Nutritionist (RDN) as the nutrition expert on the multidisciplinary care team.

OneOme   Booth #922

OneOme – cofounded by the Mayo Clinic – is a leader in precision medicine, providing pharmacogenomic
solutions, population-level value-based care analyses and clinical decision support solutions. OneOme aims to impact patient safety, reduce the overall cost of care, and improve patient health outcomes. OneOme recently introduced RightMed for Oncology, a first-of-its-kind germline pharmacogenomics panel focused on medications used as chemotherapy and supportive care. This compliments single and double-gene tests for oncology practices, including a DPYD test covering variants *2A, *13, HapB3, c.2846A>T, & c.557A>G. [www.oneome.com](http://www.oneome.com)

**Oxford BioDynamics**  **Booth #603**

Oxford Biodynamics, Plc (AIM:OBD) is a global biotech company advancing personalized healthcare by developing & commercializing precision medicine tests for life-changing diseases. Our portfolio of clinical tests and research tools based on EpiSwitch® technology aims to help physicians better understand their patient’s clinical status for therapeutic response, disease prognostication, and early cancer detection. Its flagship products are the EpiSwitch® CiRT (Checkpoint Inhibitor Response Test) and EpiSwitch® PSE (EpiSwitch Prostate Screening test) blood tests. CiRT is a predictive immune response profile for immuno-oncology checkpoint inhibitor treatments. PSE predicts a patient’s current likelihood of having prostate cancer with 94% accuracy.

**Pfizer Oncology**  **Booth #823**

At Pfizer Oncology, we are at the forefront of a new era in cancer care. Our industry-leading portfolio and extensive pipeline includes game-changing mechanisms of action to attack cancer from multiple angles, including antibody-drug conjugates (ADCs), small molecules, bispecifics and other immunotherapies. We are focused on delivering transformative therapies in some of the world’s most common cancers, including breast cancer, genitourinary cancer, and hematologic malignancies, as well as melanoma, gastrointestinal, gynecological, and thoracic cancers, which includes lung cancer. Driven by science, we are committed to accelerating breakthroughs to extend and improve patients’ lives.

**PharmaEssentia**  **Booth #605**

PharmaEssentia, based in Taipei, Taiwan, is a rapidly growing biopharmaceutical innovator. Leveraging deep expertise and proven scientific principles, the company aims to deliver effective new biologics for challenging diseases in the areas of hematology and oncology, with one approved product and a diversifying pipeline. Founded in 2003, the company is now expanding its global presence with operations in the U.S., Japan, China and Korea. Visit our [www.pharmaessentia.com](http://www.pharmaessentia.com/) to learn more.

**PreciseDx**  **Booth #704**

PreciseDx is innovating oncology diagnostics, leveraging Artificial Intelligence (AI) for revolutionary, morphology-driven, disease analysis. PreciseBreast™ is an in vitro test for early-stage breast cancer that calculates a composite risk of recurrence score based on a proprietary algorithm. PreciseBreast™ leverages AI technology within our Morphology Feature Array® to evaluate the recurrence risk of early-stage breast cancer much faster than traditional testing and with greater reproducibility and precision than any other technology currently utilized in cancer care. PreciseBreast™ is performed on digital scans without the need for tissue specimen or wet lab and can also use traditional H&E-stained slides.

**Regeneron**  **Booth #800**

Regeneron is a leading biotechnology company that invents, develops, and commercializes life-transforming medicines for people with serious diseases. Founded and led for nearly 35 years by physician-scientists, our unique ability to repeatedly translate science into medicine has led to numerous FDA-approved treatments and candidates in development. Regeneron is accelerating and improving the traditional drug development process through our proprietary VelociSuite® technologies, and through research initiatives such as the Regeneron Genetics Center. Visit [www.Regeneron.com](http://www.Regeneron.com) to learn more.

**Servier Pharmaceuticals**  **Booth #718**

Servier is a global leader in oncology focused on delivering meaningful therapeutic progress for the patients it serves. Governed by a non-profit foundation, Servier approaches innovation with a long-term vision, free of influence from investors and outside pressure to chase short-term monetary targets.

As a leader in oncology, Servier has significantly accelerated its investment in difficult and hard-to-treat cancers, with more than 50% of its research and development dedicated to delivering significant advances in areas of high unmet need throughout oncology with the potential to change the lives of the patients it serves. Within these areas, Servier is the leader in mutant IDH inhibition, with the first ever mutant IDH1 inhibitor approved in the U.S. and the European Union, and the company continues to drive the science behind targeted mutant IDH inhibition.

**SkinCure Oncology**  **Booth #722**

**About Our Exhibitors**
About Our Exhibitors

**Spectrum Pharmaceuticals**  
Table #R2
Spectrum Pharmaceuticals, Inc., a subsidiary of Assertio Holdings, Inc., is a leading commercial pharmaceutical company bringing differentiated products to patients. We have a robust portfolio of branded prescription medications. The company has grown through business development including acquisitions, licensing, and mergers. To learn more, visit [www.assertiotx.com](http://www.assertiotx.com).

**Stemline a Menarini Group Company**  
Booth #801 & #711
Stemline Therapeutics, a part of the Menarini Group, is focused on the development and commercialization of novel oncology therapeutics. The goal of our dedicated team of scientists, specialists, researchers, and developers is to build a leading biopharmaceutical company focused on improving the lives of cancer patients by developing and commercializing novel first-in-class therapeutics.

**Sun Pharma**  
Booth #707
Sun Pharma is the world's fourth largest specialty generics company with presence in Specialty, Generics and Consumer Healthcare products. It is the largest pharmaceutical company in India and is a leading generic company in the U.S. and Global Emerging Markets. Sun's high-growth Global Specialty portfolio spans innovative products in dermatology, ophthalmology, and onco-dermatology and accounts for over 16% of company sales. The company's vertically integrated operations deliver high-quality medicines, trusted by physicians and consumers in over 100 countries. Its manufacturing facilities are spread across six continents. Sun Pharma is proud of its multicultural workforce drawn from over 50 nations.

**Taiho Oncology**  
Booth #817
Taiho Oncology specializes in the development and commercialization of orally administered anti-cancer agents for various tumor types. Taiho Oncology has a robust pipeline of small molecule clinical candidates targeting solid tumor and hematological malignancies, with additional candidates in pre-clinical development. Taiho Oncology is a subsidiary of Taiho Pharmaceutical Co., Ltd. which is part of Otsuka Holdings Co., Ltd. Taiho Oncology is headquartered in Princeton, New Jersey and oversees its parent company's European and Canadian operations, which are located in Zug, Switzerland and Oakville, Ontario, Canada.

Now Enrolling
A clinical trial for patients with previously treated ER-positive, HER-negative advanced breast cancer

The VERITAC-2 study is a global, phase 3, randomized open-label study of vepdeostrant (ARV-471) vs fulvestrant in patients with ER+, HER2- advanced breast cancer. Vepdeostrant is a potent, selective, orally bioavailable PROteolysis Targeting Chimeric (PROTAC) small molecule that induces degradation of the ER.

Previously treated patients with ER+/HER2- advanced breast cancer (N=560) 1:1 randomization Vepdeostrant Fulvestrant

Vepdeostrant is an investigational compound and is not approved for any use. Its safety and efficacy have not been established.

Key Eligibility Criteria
- Women or men with ER-positive, HER-negative advanced breast cancer
- Progression on 1-2 lines of endocrine therapy (ET), one of which had to have been in combination with a CDK4/6i
- Duration of most recent ET of ≥6 months prior to progression
- No prior chemotherapy in advanced/metastatic setting

Primary Endpoint
- Progression-free survival by blinded independent central review

Scan here to find a clinical trial site near you.

FORCE improves the lives of millions of individuals and families facing hereditary breast, ovarian, pancreatic, prostate, colorectal and endometrial cancers. Our community includes people with a personal or family history of cancer, Lynch syndrome, a BRCA1, BRCA2, ATM, PALB2, CHEK2, PTEN or other inherited gene mutation linked to cancer. We accomplish this through our education, support, advocacy and research efforts.

We are grateful for the important work that you do to help members of the hereditary cancer community make informed decisions about their health. Together, we will ensure that no one faces hereditary cancer alone.
Advanced Breast Cancer (ABC) knows no boundaries, affecting individuals from diverse backgrounds, all over the world. At ABC Global Alliance, we are fostering an inclusive environment where people from different countries and backgrounds can come together, collaborate, and share knowledge and resources to improve and extend the lives of ABC patients worldwide.

The ABC Global Alliance is a non-profit association, a multi-stakeholder platform for all those interested in collaborating on common projects related to Advanced Breast Cancer.

Moffitt Cancer Center
Booth #623
Moffitt is dedicated to one lifesaving mission: to contribute to the prevention and cure of cancer. The Tampa-based facility is one of only 56 National Cancer Institute-designated Comprehensive Cancer Centers, a distinction that recognizes Moffitt’s scientific excellence, multidisciplinary research, and robust training and education. Moffitt’s expert nursing staff is recognized by the American Nurses Credentialing Center with Magnet® status, its highest distinction. With more than 9,000 team members, Moffitt has an economic impact in the state of $2.4 billion. For more information, call 1-888-MOFFITT (1-888-663-3488), visit MOFFITT.org and follow the momentum on Facebook, Twitter, Instagram and YouTube.

Roswell Park Comprehensive Cancer Center
Booth #625
Founded in 1898 and operating from a 29-acre campus on the Buffalo Niagara Medical Campus near downtown Buffalo, New York, Roswell Park today remains the only comprehensive cancer center designated by the NCI in Upstate NY. In the past year, Roswell Park’s team of 4,188 total employees, including 364 faculty members and 855 nurses, cared for more than 46,000 patients. Roswell Park helps set international standards in cancer care through its role as a founding member of the National Comprehensive Cancer Network, and consistently earns patient-satisfaction scores that are among the highest in the country.

Changing the way cancer is treated.
Kite’s singular focus is cell therapy to treat and potentially cure cancer.

We proudly serve patients around the globe from our manufacturing facilities in California, Maryland and the Netherlands.
Patient Advocacy Pavilion

**Anal Cancer Foundation** virtual only
The Anal Cancer Foundation is dedicated to empowering anal cancer patients and accelerating prevention and treatment methods that eliminate anal cancer and HPV.

**Our mission is to:**

- Highlight the relevance of HPV in contracting cancer
- Accelerate a cure for the 5% of all cancers, including anal cancer, caused by HPV
- Advocate for prevention methods that will end anal cancer and HPV-related cancers, including gender-neutral vaccination
- Support anal cancer survivors, caregivers, scientists, and providers

**Association of Cancer Care Centers (ACCC)** Kiosk #A14
The Association of Cancer Care Centers (ACCC) provides education and advocacy for the cancer care community. Founded in 1974, ACCC is a powerful network of more than 40,000 multidisciplinary practitioners from over 1,700 hospitals and practices nationwide. As advances in cancer screening and diagnosis, treatment options, and care delivery models continue to evolve—so has ACCC—adapting its resources to meet the changing needs of the entire oncology care team. For more information, visit accc-cancer.org. Follow us on LinkedIn; read our blog, ACCCBuzz; tune in to our CANCER BUZZ podcast; and view our CANCER BUZZ TV channel.

**Bag It** virtual only
Bag It educates, supports and empowers patients, caregivers & advocates. The Bag It Bag is the most respected and comprehensive resource for patient education. The Bag has a binder and resources to help patients organize medical records, cope with a diagnosis and advocate for their best quality of care. It includes publications and customizable tools designed to ensure your patients have access to current, credible information and tools to help them navigate their cancer journey.

**Bladder Cancer Advocacy Network (BCAN)** Kiosk #A5
The Bladder Cancer Advocacy Network (BCAN) is a community of patients, caregivers, survivors, advocates, medical and research professionals united in support of people impacted by bladder cancer. Founded in 2005, BCAN is the only national advocacy organization devoted to advancing bladder cancer research and supporting those impacted by the disease. BCAN’s mission is to increase public awareness about bladder cancer, advance bladder cancer research, and provide educational and support services for the bladder cancer community.

Visit bcan.org or email us at info@bcan.org to learn more about bladder cancer, find free resources, and/or sign up to receive our newsletter.

**Cancer Support Community** virtual only
The Cancer Support Community is a global nonprofit that uplifts and strengthens people impacted by cancer. We are dedicated to fostering a community where people find connection, compassion, and knowledge. We provide professionally led support and navigation services, along with social connections and award-winning education—when, where, and how impacted individuals prefer throughout their cancer experience. We break down barriers to care through education, research, and advocacy. www.cancersupportcommunity.org

**Cholangiocarcinoma Foundation** Kiosk #A11
Founded in 2006, the Cholangiocarcinoma Foundation is a global 501(c)(3) nonprofit organization. Its mission is to find a cure and improve the quality of life for cholangiocarcinoma patients. The Foundation is also part of a global alliance and partners with institutions in the United Kingdom, Thailand, Italy, Denmark, Japan, and other countries.

**CLL Society** virtual only
CLL Society is an inclusive, patient-centric, physician-curated nonprofit organization that addresses the unmet needs of the chronic lymphocytic leukemia and small lymphocytic lymphoma (CLL/SLL) community through patient education, advocacy, support, and research. We explain the rapidly changing therapeutic landscape and the importance of clinical trials, build patient support networks, engage in research, and educate providers and patients. We believe SMART PATIENTS GET SMART CARE™. Learn more at cllsociety.org.

**Crossroads4Hope** Kiosk #A9
Crossroads4Hope Mission: Crossroads4Hope's network embraces all people touched by cancer—the diagnosed and their loved ones—empowering individuals through access to resources, as well as programs of support, education, wellbeing, and hope.

Crossroads4Hope Services: We are experts in oncology and mental health, revolutionizing how we care for those facing cancer. Our services are at no cost to anyone and include professionally led individual and group support; education; distress screenings; nutrition and healthy cooking; health and wellness classes; and resources and referral. In addition to in-person and virtual programs, our digital platform, MyGo2Support, puts cancer support resources directly into patient’s and family’s hands via smartphone without having to download an app.
The Global Colon Cancer Association (GCCA) advocates for equitable access to quality colorectal cancer screenings, testing, treatments, and care, because where you live should not determine whether you can prevent or survive colorectal cancer. As both a membership-based umbrella organization and patient advocacy organization, GCCA amplifies and supports the efforts of our member organizations, develops adaptable advocacy and educational materials for our members, and conducts our own advocacy, education, and patient-centered policy initiatives.

The Global Resource for Advancing Cancer Education (GRACE) provides expert-mediated information on current and emerging cancer management options in order to empower patients, caregivers, and health professionals to become direct partners in cancer care. GRACE democratizes cutting-edge cancer care by disseminating medical information through live/on-demand programs, webinars, podcasts, and written materials, aimed to educate patients and caregivers. GRACE fosters community engagement and knowledge sharing through their online forum, bridging the gap between medical professionals and patients. GRACE exemplifies breaking down barriers in cancer care, enhancing accessibility and understanding.

GO2 for Lung Cancer transforms survivorship by working across the entire continuum of care for those who are at-risk or diagnosed with lung cancer. Support services include:

- Helpline- 1:1 support by phone, email, and website
- LungMATCH- Treatment and trial navigation
- Phone Buddy Program- Peer matching support
- Lung Cancer Living Room Series- Expert speakers share about lung cancer topics
- Gathering Hope-monthly virtual social
- Online community through HealthUnlocked
- Free educational publications on a wide variety to of topics

Head and Neck Cancer Alliance strives to serve as a One-stop Center for patients, survivors, and family members seeking support and information about head and neck cancer. From the management of symptoms to treatment options to clinical trials, HNCA works in partnership with medical and healthcare partners to provide up-to-date educational information, activities to promote awareness and education, and resources for patients to engage and learn from one another. We develop strategic priorities to tackle the challenges facing those impacted by this disease.

HealthTree is a nonprofit organization uniting patients and researchers through cutting-edge technology to work together on curing diseases. HealthTree provides lifetime personalized support and education to patients, meaningful patient-to-patient connections, and a powerful patient data portal, which transforms patients into active contributors of research that drives lifesaving breakthroughs. Visit healthtree.org

Imerman Angels' mission is To provide comfort and understanding for all cancer fighters, survivors, previvors and caregivers through a personalized, one-on-one connection with someone who has been there. Your one-on-one cancer community-so no one has to face cancer alone.

The Leukemia & Lymphoma Society is the world's largest voluntary (nonprofit) health organization dedicated to funding blood cancer research, support, and advocacy. The LLS mission is to cure leukemia, lymphoma, Hodgkin's disease, and myeloma, and improve the quality of life of patients and their families. The mission is carried out through research, patient and professional education and services, and advocating for cures and access to care.

LLS provides free support, resources, and referrals, as well as virtual and local in-person education programs and videos to help all patients, survivors and their families stay informed about and access to the best possible treatment and follow-up care. LLS patient services include financial assistance, transportation and urgent need assistance, one-on-one peer-to-peer support, nutrition counseling, online chats and forums, and support groups. Services also include up-to-date disease and treatment information provided through the LLS website and printed booklets, as well as through one-on-one dialogue with Information Specialists and Clinical Trial Navigators in LLS's Information Resource Center (IRC) and the Clinical Trial Support Center (CTSC). The IRC and CTSC are on the front lines of LLS's efforts to improve patient access to quality care and to improve...
Patient Advocacy Pavilion

patient quality of life. LLS also educates healthcare professionals about advancements in blood cancer research, treatment, side-effects management, resources for patients, and communicating with their patients about clinical trials. To access free CE/CME activities and resources visit www.LLS.org/CE.

LiveLung Kiosk #A6
LiveLung is on a mission to improve health outcomes by advancing lung cancer education, early detection, and compassion for people impacted by lung cancer. We do this by hosting a network of monthly educational community lung cancer patient groups. We provide resource bags to dozens of cancer centers where nurse navigators give them to newly diagnosed lung cancer patients. We are a 501(c)(3) nonprofit organization, here to serve the lung cancer community.

The Myelodysplastic Syndromes Foundation Inc. virtual only
The MDS Foundation is a global non-profit advocacy organization that for over 25 years has supported patients and their families as well as healthcare providers in the fields of MDS and its related diseases. The MDS Foundation supports and educates patients, their communities, and healthcare providers, and contributes to innovative research in the fields of MDS and its related continuum of diseases to better diagnose, control and ultimately cure these diseases.

Say YES to Hope Kiosk #A13
Say YES to Hope is changing the world of advanced cancer through outreach, education, support, and hope. We are committed to serving these oft forgotten cancer patients as the association between access to care and support creates increased survival, better outcomes, and improved quality of life YES is a champion in the advanced cancer advocacy community. We are challenging you to join us and “bee the change” in the fight against advanced cancer!

Sharsheret Kiosk #A10
Sharsheret is a national not-for-profit organization that supports women and families facing breast or ovarian cancer, or who are at higher diagnostic risk. Our free, confidential support includes access to social workers, a genetic counselor, and a range of programs, including financial subsidies, to help women a navigate cancer diagnosis. Sharsheret has a wide array of educational brochures for you to share with patients and offers free professional training for your team (CE credit may be available). For more information or to order resources, visit us at www.sharsheret.org or call us at (866) 474-2274.

Tigerlily Foundation Kiosk #A2
Tigerlily Foundation is one of the premier global organizations providing education, awareness, advocacy, empowerment and transformational programs to girls, young women, breast cancer survivors, metastivors, and caregivers – before, during and after breast cancer. Our programs impact young women of diverse ethnic backgrounds, underserved communities and those facing health disparities. Our programs also incorporate spirituality, holistic health, prevention, wellness, support, and survivorship programs to help you live your best life.

Tigerlily’s ANGEL Advocacy Program provides comprehensive training for women of color between the ages of 21 – 50, who have been impacted by breast cancer. Contact us today to learn more!

Triage Cancer Kiosk #A15
Triage Cancer is a national, nonprofit organization that provides free education on legal and practical issues that may impact individuals diagnosed with cancer and their caregivers, through events, materials, and resources.

Veterans Prostate Cancer Awareness Kiosk #A7
Veterans Prostate Cancer Awareness (VPCa) is a nonprofit organization dedicated to promoting prostate awareness in the Veteran Population. The Goals and Mission of VPCa are to:

• Provide prostate cancer educational information and promote awareness among US Veteran population.
• Educate Veterans on screening, and available treatment options when faced with a prostate cancer diagnosis and empower Men to become their own Health Advocates.
• Promote new technologies for the treatment and cure of prostate cancer.

Young Adult Survivors United (YASU) Kiosk #A12
Young Adult Survivors United (YASU) provides emotional, social, and financial support to young adult cancer patients & survivors aged 18-45 when diagnosed and their caregivers/co-survivors, enhancing their quality of life and hosting an age-appropriate community they need for peer support. Our virtual platform outreaches across the U.S. with in-person programming in Pittsburgh, PA where it is headquartered. Additional programs include free daylong or overnight respite trips, self-love workshops, and educational wellness seminars.
Did you know....

• Veterans are 40% more likely to develop Prostate Cancer?

• 15,000 new cases are diagnosed in the VHA System each year?

• There are over 500,000 Veterans in the VHA living with Prostate Cancer?

• You should screen early for prostate cancer if you are a Veteran?

Saving Veterans through Education, Awareness & Advocacy

Awareness. Education. Advocacy.

The Global Colon Cancer Association (GCCA) provides medically accurate patient educational materials about CRC biomarkers and their treatment impact, as well as patient stories and advocacy resources through our Know Your Biomarker program at knowyourbiomarker.org.

You can also find patient materials on CRC signs and symptoms, screening, prevention, and treatment on the GCCA website at globalcca.org/learn/colorectal-cancer.

Scan this QR code to receive our printed materials by mail. You can also download printable files on our website.

CONFRONTING LUNG CANCER STARTS HERE.

From the realization of risk to the moment of diagnosis, from finding care to staying informed and building your resources, we relentlessly advocate for all people at risk and living with lung cancer to confront the disease.

As your friends, your guides, your teachers, your advocates and your support system, GO2 is your go-to.

Learn more at go2.org.

Helpline: 1-800-298-2436
CCF’s Nursing Advisory Board

The Nursing Advisory Board (NAB) is comprised of nursing professionals (RN, MSN, DNP) with expertise in the management of patients with cholangiocarcinoma and who are currently practicing in cancer research centers throughout the United States.

MEMBERSHIP

Applications are accepted for review by NAB and CCF leadership. Membership may also be at the invitation of NAB leadership team. While there are no term limits, active participation is required for the following:

- Quarterly Meetings (virtual)
- Attendance at the Cholangiocarcinoma Foundation Annual Conference

PURPOSE

The NAB works collaboratively to generate and distribute education on various platforms that are specific to the treatment, care, and management of patient’s with cholangiocarcinoma. In conjunction with the Medical Advisory Board and the CCF patient advocacy team, the NAB tailors material to the needs of patients, caregivers, and local healthcare professionals who are caring for patients with CCA and include but are not limited to the following:

- Clinical nursing practice guidelines
- CCF annual conference presentations/updates
- Patient/caregiver educational series through CCF webinars
- Abstract and poster presentations at national cancer conferences

for more information, please visit curecca.org/nab
Tigerlily offers comprehensive programming across the continuum of breast health research, screening, prevention, and treatment to dismantle disparities and increase access to the care patients deserve.

We are committed to mobilizing our community of young women, caregivers, and loved ones to transform lives and recognize that we must Advocate Now to Grow, Empower & Lead through the ANGEL Advocacy Program.

The Clinical Trials Program is a transformational initiative to accelerate the delivery of innovative treatments to our patients with a strategic focus on populations that face the highest disparities.

To ensure patients and healthcare providers have the right resources at their fingertips to better equip patients and caregivers as they navigate a cancer diagnosis, download our Barrier Toolkits.

In partnership with WITT Forever, the RAISE platform makes it easy for patients to get resources and assistance for support and empowerment without feeling as though they are burdening others.

COME SEE US AT KIOSK A2!

General Poster Session II
Hosted by NCCN Oncology Research Program (ORP)
Session II, Saturday, April 6
Breakfast 7:30 - 8:30 AM | Morning Break 9:45 - 10:05 AM
Lunch 11:55 AM - 1:10 PM | Afternoon Break 3:00 - 3:30 PM

Follow the Expert Guided Poster Tour
Open to all attendees. No pre-registration required. Experts from NCCN Member Institutions will lead a group of conference attendees and highlight research. Meet by the Posters in the Exhibit Hall at 12:25 PM.

Help people living with cancer. You can provide support for FREE RESOURCES and INNOVATIONS IN ONCOLOGY RESEARCH.

NCCNFoundation.org/Donate

Our network embraces all people touched by cancer - the diagnosed and their loved ones - empowering individuals to take control of their health through access to resources, and programs of support, education, wellbeing and hope.

MyGo2Support, 24/7 Digital Patient Support Mobile Platform

Individual & Group Support (Apoyo emocional)

Nutrition Programs (Educación de nutrición)

Mind & Body Classes (Clases de salud)

Financial Assistance (Asistencia financiera)

Educational Workshops (Programas educativos)

Support4Families (Apoyo para familias)

My Voice Matters: Treatment Decision Support (Herramientas de apoyo a decisiones)

Resources & Referrals (Recursos y referencias)

Closing the Cancer Care Gap.

Accepting caregiver and patient referrals nationwide.

3 Crossroads Drive, Bedminster, NJ 07921 | www.crossroads4hope.org | 908-658-5400
Jazz Pharmaceuticals is a global biopharmaceutical company whose purpose is to innovate to transform the lives of patients and their families. We are dedicated to developing potentially life-changing medicines for people with serious diseases — often with limited or no therapeutic options.
NCCN Guidelines for Patients®
