

# ADVANCING QUALITY CANCER CARE AROUND THE GLOBE

*NCCN Content is utilized throughout all regions of the world, with more than 15 million NCCN Clinical Practice Guidelines in Oncology (NCCN Guidelines®) downloaded worldwide annually.*

NCCN Guidelines® document evidence-based, consensus-driven management to ensure all people receive preventive, diagnostic, treatment, and supportive services that are most likely to lead to optimal outcomes.

NCCN Guidelines provide recommendations based on the best evidence available at the time they are derived. Given the rapid pace of innovation in oncology, it is essential that NCCN Guidelines are continuously updated and revised. NCCN Guidelines assist in the decision-making process for all those involved in cancer care—physicians, nurses, pharmacists, policymakers, patients and their families—to improve patient care and outcomes.

## **IMPACT OF HUMANITARIAN CRISES ON CANCER CARE**

As an organization whose mission is to improve cancer care globally, NCCN stands in solidarity with people worldwide whose cancer care has been disrupted by health emergencies and humanitarian crises. NCCN is committed to providing resources to support the delivery of cancer care in regions where conflict is profoundly affecting patients, providers, and healthcare systems.

## CLINICAL RESOURCES

- **NCCN GUIDELINES TRANSLATIONS**

*NCCN Guidelines available in multiple languages*

There are more than 270 translated clinical resources available for free on NCCN's website and app. Through support from outside organizations, NCCN Guidelines and NCCN Guidelines for Patients® are available in several languages, including: Arabic, Chinese, French, German, Italian, Japanese, Korean, Polish, Portuguese, Spanish, and Ukrainian.

- **NCCN GUIDELINES REGIONAL ADAPTATIONS**

*NCCN Guidelines adapted for specific regions and countries*

NCCN adaptations account for metabolic differences in populations, accessibility of technology, and regulatory status of health care technologies used in cancer management in the specified country/region. NCCN has ongoing adaptation collaborations with oncology thought leaders across the globe.

- **NCCN FRAMEWORK™**

*NCCN Guidelines stratified by resource level*

NCCN Framework for Resource Stratification of NCCN Guidelines (NCCN Framework™) guide evidence-based adaptation to available clinical treatment resources, define appropriate treatment pathways based on available resources—Basic, Core, Enhanced, and NCCN Guidelines—and deliver a tool for health care providers to identify treatment options that will provide the best possible outcomes given specific resource constraints. The library of NCCN Framework™ now covers a vast majority of global cancer cases.

- **NCCN HARMONIZED GUIDELINES™**

*NCCN Guidelines for specific resource-constrained locations*

NCCN Harmonized Guidelines™ are targeted regional resources created as part of collaborative efforts to address increasing rates of cancer and unique care circumstances. They represent both the optimal care that low- and mid-resource countries aspire to provide and pragmatic approaches that provide effective treatment options for resource-constrained settings of specific regions.
