The NCCN Digital Resource Booklet includes information from 6 patient advocacy organizations on programs and resources to support people with cancer in the LGBTQ+ community.

This Booklet was developed in conjunction with The National Comprehensive Cancer Network’s® (NCCN®) Patient Advocacy Summit: Best Practices and Policies for Addressing the Health Needs of LGBTQ+ Cancer Patients and Survivors on December 2, 2022.

To view a broader list of advocacy and support groups on the NCCN website, visit NCCN.org/patients/support-groups.

Cancer Support Community

The Cancer Support Community (CSC) is a global non-profit network of 175 locations, including CSC and Gilda's Club centers, health-care partnerships, and satellite locations that deliver more than $50 million in free support services to patients and families. In addition, CSC administers a toll-free helpline and produces award-winning educational resources that reach more than one million people each year. Formed in 2009 by the merger of The Wellness Community and Gilda's Club, CSC also conducts cutting-edge research on the emotional, psychological, and financial journey of cancer patients. In addition, CSC advocates at all levels of government for policies to help individuals whose lives have been disrupted by cancer.

Share Your Voice: Take the Cancer Experience Registry Survey!

The Cancer Experience Registry (CER) from Cancer Support Community is an online research study that uncovers the emotional, physical, practical, and financial impact of cancer to help patients, survivors, and caregivers get the support they need. The study is open to any adult living in the U.S. or Canada who has been diagnosed with cancer at any point in their life or has been a family or informal caregiver to someone with cancer. The CER aims to elevate the voices of ALL people impacted by cancer to influence real-world outcomes. Data from the CER is regularly used to influence healthcare policies, enhance cancer care, and improve support services. Share your voice and help change the future of cancer support!

The Chrysalis Initiative

Provides patients from disparate groups with mentoring and resource navigation. Their BC Navi app offers education, a supportive online forum, one-on-one coaching tailored to where you are on your breast cancer journey, a personalized dashboard, and the ability to find and create reviews and ratings about the quality of care provided at healthcare centers in your area.

Resource or Program Information

BC Navi

BC Navi is a website and app that works to erase the line of healthcare inequality for Black women by providing resources to recognize and address racism in their breast cancer care. Together, we will hold healthcare providers accountable and ensure every patient receives the care they deserve. One-on-one coaching informs and empowers patients throughout their treatment, helping them to feel confident and in charge by managing the worries and challenges specific to their experiences. Through this social support and evidence-based information, Black women are given the tools they need to recognize bad practices in breast cancer healthcare and reimagine treatment and screening protocols for more equitable outcomes. This tailored relationship helps patients learn to advocate for equitable quality of care and, ultimately, better treatment outcomes. No more waiting on a biased system.

Together Equitable Accessible Meaningful (TEAM) training

This training aims to improve health equity by supporting organizational changes at the systems level. The training will help organizations implement quality improvements to advance equitable, accessible and patient-centered cancer care through improved patient-provider communication, cultural sensitivity, shared decision-making and attention to health literacy.

“I Want You to Know” Printable Cards

This “I Want You to Know” printable card can help patients begin a conversation with their provider about their identity and care preferences. Versions of the cards are available in English, Spanish and Chinese (simplified). Interested in branding the cards with your organization's logo? There's a blank version so your organization can insert their own logo and contact information if needed. A GW Cancer Center-branded version is also available.

Prostate Cancer: Resources to Take Charge of Your Health

Transgender women and gender non-conforming individuals have health care needs that are often not talked about. It may be uncomfortable to think about parts of the body that may still be there after you have transitioned. This fact sheet is only a starting point. It can help you talk with your doctor if you have prostate cancer. There are also tips for you and your partner(s) to help manage the effects of treatment. The resources list on the back has more information.

**LGBTQ+ Cancer Virtual Peer Support Groups**

In 2021, we launched our first-ever, virtual LGBTQ+ cancer peer support groups. We know that many LGBTQ+ cancer patients and survivors often do not feel welcome or understood in mainstream support groups, and transgender survivors are especially excluded. Individuals who live further from major metropolitan areas are also unlikely to find a support group at all. A study conducted by the National LGBT Cancer Network confirmed that LGBTQI+-specific support groups were the top request made by LGBTQI+ cancer survivors.

These are free Zoom peer-support groups for LGBTQ+ individuals who have or have had cancer. They are offered three times a week. A promotional flier is available and can be co-branded for posting in your cancer center.

**Welcoming Spaces: Treating Your LGBTQ+ Patient**

Welcoming Spaces is an updated and expanded version of our flagship LGBTQ+ Cultural Humility training designed specifically for healthcare professionals. Developed in collaboration with the Society of Gynecologic Oncology, the eight modules are each 45 minutes long, available for Continuing Education (CE) Credits, and free for the remainder of 2022.

Tailored Outreach Materials & Technical Assistance

Direct members are eligible for direct technical assistance from us. Organizational membership is free. We currently have over 450 tobacco and cancer control national, state, and local agencies, academic institutions or projects that are members. Our short- and long-term technical assistance focuses on a variety of topics including: provider trainings, best practices for reaching and engaging our population, and enhancement of data collection.

The National LGBT Cancer Network provides customized graphics for social media platforms, flyers, postcards and other print materials via our online resource library. These materials are available free of cost to our members and address a variety of topics and issues. One of our most popular bundles aims to raise awareness about colorectal, breast, lung, skin, and cervical cancer among members of the LGBTQ+ community. And our most recent set of graphics focuses on colorectal cancer screening guidelines for people of all genders. Interested members can add their logos to these media materials; we provide the graphics in the necessary formats. Our content is also available to state health departments via the Media Resource Campaign Center which is operated by the CDC.

LGBTQ+ cancer resource pages

At the National LGBT Cancer Network, we aim to address the needs of our communities across the cancer continuum. Our prevention initiatives include one of the few LGBTQ+ cessation Quitline portals designed to provide community-specific motivation and encouragement to LGBTQ+ people who use tobacco products. For transgender and gender non-conforming cancer patients, our TRANSforming Cancer Microsite offers support, resources and personal stories. Lastly, we recognize that LGBTQ+ individuals affected by cancer, whether they have been recently diagnosed or are in remission, lead full lives. Thus, our sex after cancer microsite, Frankly, addresses the impact of cancer on the sex lives of members of our communities. Frankly is on a mission to dispel the myth that queer people on the cancer journey are just happy to be alive. We know people with chronic illness are sexual and desire sex. This space is for LGBTQ+ folks to share stories about their sexual desires and changing needs, the challenges disabilities can have on relationships and breakthrough discoveries about how to reclaim intimacy and gain sexual satisfaction. From prevention to remission, we are proud to offer tailored resources for LGBTQ+ communities across the country.
