NCCN Breast Panel:

On behalf of ASTRO, I respectfully request the NCCN Compendium Panel to review the enclosed recommendation for inclusion and/or clarification in the NCCN Radiation Therapy Compendium.

Title of Compendium section: Breast, Locoregional recurrence, Invasive

Specific Changes: Recommend clarification on the locoregional recurrence section of the Breast Guideline reading “no prior RT, but consider re-irradiation if it can be safely administered.”

Rationale: The current description on the compendium is confusing by stating re-irradiation for those with no prior radiation.

Thank you for your time and consideration of these items.

Sincerely,

Laura I. Thevenot
Chief Executive Officer
