Knowledge.
Hope.
Healing.

These are the stories of critical research and making a difference for patients.
Dr. Kemi Doll was awarded an NCCN Foundation Young Investigator Awards (YIA) grant in 2017.

Her research found disparities in the treatment of Black women with endometrial cancer. It also showed that changes in care may improve the rates of early diagnosis among Black women.

Dr. Doll and 50 other early career experts have used their YIA grants to improve the diagnosis and treatment of cancer all over the world.

Please give generously to help transform cancer care through the YIA Program!
NCCN Guidelines for Patients® for Prostate Cancer Ranked #1 in recent study!

A recent peer-reviewed study¹ published in Current Urology found that NCCN Guidelines for Patients are one of the most trustworthy resources for prostate cancer information.

Out of the top 90 Google results for information on prostate cancer, the NCCN Guidelines for Patients received the highest rankings in both reliability and transparency.

More than 1,500 cancer experts from 30 leading cancer centers donate their time to create the NCCN Guidelines®. The Guidelines inform cancer treatment across the globe.

NCCN Foundation raises funds to adapt those clinical guidelines into patient guidelines. Patients have the same information as their doctors allowing shared decision making.

NCCN Guidelines for Patients are free and can be accessed at nccn.org/patients

Your support of the NCCN Guidelines for Patients helps patients make the best decisions about their cancer care.

Stan Rosenfeld is a prostate cancer advocate and leads a Prostate Cancer Support group serving over 650 men. Stan also serves on the NCCN Guidelines Panel for Prostate Cancer, and witnesses patients’ need for accurate, complete, and detailed information firsthand.

In my support groups, the NCCN Guidelines for Patients is the #1 resource they use. It is a big, big hit with patients!

A prostate cancer diagnosis is a traumatic experience. Then patients have to make one of the most important and difficult decisions in their lives … what to do.

They have several equal treatment options, but many doctors won’t tell them which one to choose. Patients must balance the outcomes of treatment with possible long term side effects. The decision is really up to the patient’s personal preferences.

Patients go to the NCCN Guidelines for Patients and they get accurate information on how to compare the treatments.”

— Stan Rosenfeld

About NCCN

The National Comprehensive Cancer Network® (NCCN®) is an alliance of 30 leading cancer centers across the United States devoted to patient care, research, and education.

NCCN develops two types of cancer care guidelines:

1. **NCCN Clinical Practice Guidelines in Oncology (NCCN Guidelines®)**
   - Developed by doctors from NCCN cancer centers using the latest research and years of experience
   - Expert recommendations for cancer screening, diagnosis, and treatment
   - For providers of cancer care all over the world
   - Visit NCCN.org/guidelines

2. **NCCN Guidelines for Patients®**
   - Present information from the NCCN Guidelines in an easy-to-learn format
   - For people with cancer and those who support them
   - Explain the cancer care options likely to have the best result
   - Visit NCCN.org/patientguidelines

About NCCN Foundation

Through philanthropic support, the NCCN Foundation® empowers people through knowledge and advances the mission of NCCN to improve and facilitate quality, effective, efficient, and accessible cancer care so patients can live better lives.
